Contents

Preface vii

Part I. General Properties of Lattice Dynamical Systems

Coupled map lattices: Some topological and ergodic properties
L.A. Bunimovich 1

Infinite-dimensional SRB measures
J. Bricmont and A. Kupiainen 18

Generalized phase transitions in finite coupled map lattices
M. Blank 34

Non-trivial collective behavior in coupled map lattices: A transfer operator perspective
H. Chaté and J. Losson 51

Dynamics of coarse-grained variables in spatially extended systems
G. Nicolis, M. Op de Beeck and C. Nicolis 73

Topological and measure-theoretic properties of one-dimensional cellular automata
F. Blanchard, P. Kůrka and A. Maass 86

Quasilinear cellular automata
C. Moore 100

On the abundance of traveling waves in 1D infinite cellular automata
M. Courbage 133

A new class of automata networks
N. Boccara, H. Fukś and S. Geurten 145

The topological skeleton of cellular automaton dynamics
C. Domain and H. Gutowitz 155

Computational mechanics of cellular automata: An example
J.E. Hanson and J.P. Crutchfield 169

Boltzmann-type equations for elementary reversible cellular automata
S. Takesue 190

Breathers in nonlinear lattices: Existence, linear stability and quantization
S. Aubry 201

Exact solutions in the FPU oscillator chain
P. Poggi and S. Ruffo 251

Part II. Phenomenology of Lattice Dynamical Systems

Collective chaos and noise in the globally coupled complex Ginzburg–Landau equation
M.-L. Chabanol, V. Hakim and W.-J. Rappel 273

Power-law spatial correlations and the onset of individual motions in self-oscillatory media with non-local coupling
Y. Kuramoto and H. Nakao 294

Spatiotemporal dynamics of mesoscopic chaotic systems
R. Kapral and X.-G. Wu 314

Dynamics of chaos–order interface in coupled map lattices
O. Rudzick, A. Pikovsky, C. Scheffczyk and J. Kurths 330

Exotic reaction fronts in the steady state
S. Cornell and M. Droz 348
Chaotic properties of a one-dimensional Lorentz gas
C. Appert, C. Bokel, J.R. Dorfman and M.H. Ernst 357
Chaotic-like behaviour in chains of stable nonlinear oscillators
R. Bonaccini and A. Politi 362
Phase transitions in 2D linearly stable coupled map lattices
Y. Cuche, R. Livi and A. Politi 369
Mode-locking in coupled map lattices
R. Carretero-González, D.K. Arrowsmith and F. Vivaldi 381
Wavelike patterns in one-dimensional coupled map lattices
G. He, A. Lambert and R. Lima 404
On stability of structures and patterns in extended systems
L.A. Bunimovich, V. Franceschini, C. Giberti and C. Vernia 412
Stability of spatio-temporal structures in a lattice model of pulse-coupled oscillators
A. Díaz-Guilera, A. Arenas, A. Corral and C.J. Pérez 419
Self-organized-criticality and synchronization in pulse coupled relaxation oscillator systems; the Olami, Feder and Christensen and the Feder and Feder model
S. Bottani and B. Delamotte 430
Synchronization in lattices of coupled oscillators
V.S. Afraimovich, S.-N. Chow and J.K. Hale 442
Adaptive synchronization of globally coupled chaotic oscillators using control in noisy environments
B. Cazelles, G. Boudjema and N.P. Chau 452

Part III. Related Models, Modeling, and Miscellaneous Works
Non-trivial exponents in coarsening phenomena
B. Derrida 466
Critical growth phenomena in cellular automata
K. Eloranta 478
Infinite numbers of absorbing states: Critical behavior
M.A. Muñoz, G. Grinstein, R. Dickman and R. Livi 485
FKG inequalities in cellular automata and coupled map lattices
I. Mezić 491
Coupled maps with growth and death: An approach to cell differentiation
K. Kaneko 505
Coupled map lattices simulating hydrodynamical turbulence
C. Beck 528
Migration in cellular automata
B. Schönfisch and C. Lacoursière 537
Dynamical phases in a cellular automaton model for epidemic propagation
G. Rousseau, B. Giorgini, R. Livi and H. Chaté 554
Parameter identification in noisy extended systems: A hydrodynamic case
J.M. Fullana, M. Rossi and S. Zaleski 564

Quantum intermittency in almost-periodic lattice systems derived from their spectral properties
G. Mantica 576
Solitary dilation waves in a circular array of liquid columns
F. Giorgiutti and L. Limat 590
A novel integration scheme for partial differential equations: An application to the complex Ginzburg–Landau equation
A. Torcini, H. Frauenkron and P. Grassberger 605

List of contributors 611
